Seminar über Microwave and Atmospheric Physics

Referent/in: Dr. Yasmine Calisesi, Bundesamt für Energie BFE, Bern

Titel: PhD – and then?

19 years ago (gee…) I received my PhD from the University of Berne. My focus then was on the middle atmosphere, ozone, and optimal estimation. What happened to me since then? What is the connection between atmospheric physics and energy policy such as elaborated at the Swiss Federal Office of Energy (SFOE)? Why was it fun working there for over twelve years? And where is my professional path going from now? In this somewhat personal talk, I will give you an insight of my work at SFOE, of particular projects we supported, of the benefits and constraints of working at a federal ministry, and of the wealth of experience this position allowed me to gather.

Zeit: Freitag, 10.05.2019, 10:15 Uhr

Ort: Hörsaal A97, Gebäude Exakte Wissenschaften, Sidlerstrasse 5, Bern, Schweiz
