**UNIVERSITÄT
BERN**

Seminar über Microwave and Atmospheric Physics

Referent/in: Jonas Hagen, IAP, University of Bern

Titel: An introduction to „Git“

"Git" is the gold standard for version control and collaboration in teams of scientists and engineers. It is a piece of open source software that is widely adopted in industry. For scientists it is the tool for reproducible and collaborative science, where they co-author code, data and manuscripts while keeping track of who changed what, when and why.

This seminar will give a basic introduction to git and related services such as github.com followed by a hands-on workshop where you are invited to bring your laptop and work on close-to-real-life examples until noon. The goal is to enable the participants to use git effectively in their everyday work with the tools they are already used to.

Zeit: Freitag, 17.05.2019, 10:15 Uhr

Ort: **Hörsaal A97**, Gebäude Exakte Wissenschaften, Sidlerstrasse 5, Bern, Schweiz
