Seminar über Microwave Physics and Atmospheric Physics

Referent/in: Dr. Hervé Lamy, Belgian Institute for Space Aeronomy, Brussels

Titel: BRAMS is a Belgian network using forward scatter radio techniques to detect and study meteoroids entering the Earth's atmosphere.

It consists of 26 identical receiving stations installed all over Belgium and one dedicated transmitter located in the south of Belgium.

During this talk, the current network will be described in detail as well as the objectives and current status of the project. We will also discuss the next version of the network (called BRAMS 2.0) as well as the in-house meteor radar system that we are currently building as well.

Zeit: Freitag, 27.09.2019, 10:15 Uhr

Ort: **Hörsaal A97**, Gebäude Exakte Wissenschaften, Sidlerstrasse 5, Bern, Schweiz
